4. Non-Stormwater Discharge Prohibitions (Reporting Period: September 11, 2021 – June 30, 2022)

Complete the following items in this section.

4.1 Provide an assessment of the effectiveness of the Permittee’s control measures in effectively prohibiting non-stormwater discharges into the MS4 to the receiving water [Order – III.A].

The City of Ojai prohibits non-stormwater discharges through multiple city ordinances. The City also has an Illicit Connection/Illicit Discharge program in place, with a progressive enforcement response plan. Public Works and City staff investigate illicit discharges immediately of being reported. Staff provides outreach material during illicit discharge investigations to the responsible party to prevent reoccurrences, and performs follow-up inspections to ensure discharges have been halted and cleaned. All investigations are tracked and stored in an electronic database.

4.2 Describe sources of non-stormwater discharges determined to be a NPDES permitted discharge, a discharge subject to CERCLA, a conditionally exempt non-stormwater discharge, or entirely comprised of natural flows [Order - III.A.2].

Conditionally exempt non-stormwater discharges that occur in the City of Ojai include water line flushing, firefighting activities, landscape irrigation, dechlorinated swimming pools, non-commercial car washing, street/sidewalk wash water, foundation drains, and natural flows. The City of Ojai does not discharge to an ASBS.

4.3 Check all that apply [Order – III.A.4].

There has been non-stormwater discharge(s) to an ASBS	<input type="checkbox"/>
The non-stormwater discharge(s) to the ASBS caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS	<input type="checkbox"/>
Additional BMPs were implemented to address the exceedances above	<input type="checkbox"/>

4.4 If you had non-stormwater discharge(s) to an ASBS that caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS, describe what additional BMPs were implemented to address these exceedances. How effective were those BMPs in addressing the exceedances? [Order - III.A.4.b]

(Provide information within this space)

4.5 Did you develop and implement procedures to ensure that a discharger, if not a named Permittee in this Order, fulfilled the requirements of Part III.A.5.a.i-vi? If so, provide a link to where the procedures may be found or attach to this Annual Report [Order – III.A.5.a].

https://library.qcode.us/lib/ojai_ca/pub/municipal_code/item/title_5-chapter_12

4.6 Did you organize and maintain records of all notifications, local permits, and non-stormwater discharges greater than 100,000 gallons in an electronic database? (Yes or No) [Order – III.A.5.b]

Yes.. The City of Ojai maintains a database of all illicit connections and illicit discharges. There were no reported discharges of greater than 100,000 gallons during this reporting year.

4.7 Did you determine that any of the conditionally exempt non-stormwater discharges, with the exception of essential non-stormwater discharges, identified per Part III.A.5.c of the Order is a source of pollutants that causes or contributes to an exceedance of applicable receiving water limitations and/or water quality-based effluent limitations? If so, how many of the conditionally exempt non-stormwater discharges in Part III.A.3.b of the Order did you determine to be sources of pollutants that caused or contributed to an exceedance of receiving water limitations or WQBELs? If you made that determination, which type(s) of non-stormwater discharges in Part III.A.3.b were sources of pollutants? [Order – III.A.6]

The City of Ojai is currently developing a watershed management program (WMP). This question is effective after WMP is approved for implementation.

4.8 If you answered yes to the question 4.7 above, check all that apply [Order – III.A.6].

8. Additional Information (Optional)

Provide any additional information in this section.

You may use this section to report any additional information not specified in Sections 2-7 such as information better presented outside of the report form structure, data limitations that prevented the required information from being obtained, and additional detailed summary table describing control measures.

(Provide information within this space and/or reference any attachment(s))

8a. Non-Stormwater Discharge Prohibitions (Reporting Period: July 1, 2021 – September 10, 2021)

Complete the following items in this section.

6.1 Provide an assessment of the effectiveness of the Permittee's control measures in effectively prohibiting non-stormwater discharges into the MS4 to the receiving water [Order – III.A].

The City of Ojai prohibits non-stormwater discharges through multiple city ordinances. The City also has an Illicit Connection/Illicit Discharge program in place, with a progressive enforcement response plan. Public Works and City staff investigate illicit discharges immediately of being reported. Staff provides outreach material during illicit discharge investigations to the responsible party to prevent reoccurrences, and performs follow-up inspections to ensure discharges have been halted and cleaned. All investigations are tracked and stored in an electronic database.

6.2 Describe sources of non-stormwater discharges determined to be a NPDES permitted discharge, a discharge subject to CERCLA, a conditionally exempt non-stormwater discharge, or entirely comprised of natural flows [Order - III.A.2].

Conditionally exempt non-stormwater discharges that occur in the City of Ojai include water line flushing, firefighting activities, landscape irrigation, dechlorinated swimming pools, non-commercial car washing, street/sidewalk wash water, foundation drains, and natural flows. The City of Ojai does not discharge to an ASBS.

6.3 Check all that apply [Order – III.A.4].

There has been non-stormwater discharge(s) to an ASBS	<input type="checkbox"/>
The non-stormwater discharge(s) to the ASBS caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS	<input type="checkbox"/>
Additional BMPs were implemented to address the exceedances above	<input type="checkbox"/>

6.4 If you had non-stormwater discharge(s) to an ASBS that caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS, describe what additional BMPs were implemented to address these exceedances. How effective were those BMPs in addressing the exceedances? [Order - III.A.4.b]

(Provide information within this space)

6.5 Did you develop and implement procedures to ensure that a discharger, if not a named Permittee in this Order, fulfilled the requirements of Part III.A.5.a.i-vi? If so, provide a link to where the procedures may be found or attach to this Annual Report [Order – III.A.5.a].

https://library.qcode.us/lib/ojai_ca/pub/municipal_code/item/title_5-chapter_12

6.6 Did you organize and maintain records of all notifications, local permits, and non-stormwater discharges greater than 100,000 gallons in an electronic database? (Yes or No) [Order – III.A.5.b]

Yes.. The City of Ojai maintains a database of all illicit connections and illicit discharges. There were no reported discharges of greater than 100,000 gallons during this reporting year.

6.7 Did you determine that any of the conditionally exempt non-stormwater discharges, with the exception of essential non-stormwater discharges, identified per Part III.A.5.c of the Order is a source of pollutants that causes or contributes to an exceedance of applicable receiving water limitations and/or water quality-based effluent limitations? If so, how many of the conditionally exempt non-stormwater discharges in Part III.A.3.b of the Order did you determine to be sources of pollutants that caused or contributed to an exceedance of receiving water limitations or WQBELs? If you made that determination, which type(s) of non-stormwater discharges in Part III.A.3.b were sources of pollutants? [Order – III.A.6]

The City of Ojai is currently developing a watershed management program (WMP). This question is effective after WMP is approved for implementation.

6.8 If you answered yes to the question 4.7 above, check all that apply [*Order – III.A.6*].

Effectively prohibit the non-stormwater discharge into the MS4	<input type="checkbox"/>
Impose conditions in addition to those in Table 5 of the Order, subject to approval by the Los Angeles Water Board Executive Officer, on the non-stormwater discharge such that it will not be a source of pollutants	<input type="checkbox"/>
Require diversion of the non-stormwater discharge to the sanitary sewer	<input type="checkbox"/>
Require treatment of the non-stormwater discharge prior to discharge to the receiving water	<input type="checkbox"/>

7.2 Los Angeles County Permittees: Did you consider dry weather receiving water monitoring data downstream of the outfalls and other relevant information to determine if re-screening is necessary for any of the previously screened outfalls that did not have significant non-stormwater discharge? If so, explain how many outfalls require re-screening and when re-

screening will be completed. If applicable, describe any changes made to the program [Attachment E – VII.D.2].
