4.1 Provide an assessment of the effectiveness of the Permittee’s control measures in effectively prohibiting non-stormwater discharges into the MS4 to the receiving water [Order – III.A].

The City of Oxnard prohibits non-stormwater discharges through multiple city ordinances. The City also has a robust IDDE program. City staff investigate illicit discharges within 24 hours of being reported. City staff provide outreach material during illicit discharge investigations to the responsible party to prevent reoccurrences. All investigations are tracked in an electronic GIS database.

4.2 Describe sources of non-stormwater discharges determined to be a NPDES permitted discharge, a discharge subject to CERCLA, a conditionally exempt non-stormwater discharge, or entirely comprised of natural flows [Order - III.A.2].

Conditionally exempt non-stormwater discharges that occur in the City of Oxnard include fire-fighting activities, landscape irrigation, dechlorinated swimming pools, non-commercial car washing, street/sidewalk wash water, and natural flows. The City of Oxnard does not discharge to an ASBS.

4.3 Check all that apply [Order – III.A.4].

There has been non-stormwater discharge(s) to an ASBS	<input type="checkbox"/>
The non-stormwater discharge(s) to the ASBS caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS	<input type="checkbox"/>
Additional BMPs were implemented to address the exceedances above	<input type="checkbox"/>

4.4 If you had non-stormwater discharge(s) to an ASBS that caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS, describe what additional BMPs were implemented to address these exceedances. How effective were those BMPs in addressing the exceedances? [Order - III.A.4.b]

N/A

4.5 Did you develop and implement procedures to ensure that a discharger, if not a named Permittee in this Order, fulfilled the requirements of Part III.A.5.a.i-vi? If so, provide a link to where the procedures may be found or attach to this Annual Report [Order – III.A.5.a].

https://codelibrary.amlegal.com/codes/oxnard/latest/oxnard_ca/0-0-0-83463

4.6 Did you organize and maintain records of all notifications, local permits, and non-stormwater discharges greater than 100,000 gallons in an electronic database? (Yes or No) [Order – III.A.5.b]

Yes. In effect since 2010 as part of the discharge prohibitions. The City of Oxnard maintains a database of all illicit connections and illicit discharges. There were no reported discharges of greater than 100,000 gallons during this reporting year.

4.7 Did you determine that any of the conditionally exempt non-stormwater discharges, with the exception of essential non-stormwater discharges, identified per Part III.A.5.c of the Order is a source of pollutants that causes or contributes to an exceedance of applicable receiving water limitations and/or water quality-based effluent limitations? If so, how many of the conditionally exempt non-stormwater discharges in Part III.A.3.b of the Order did you determine to be sources of pollutants that caused or contributed to an exceedance of receiving water limitations or WQBELs? If you made that determination, which type(s) of non-stormwater discharges in Part III.A.3.b were sources of pollutants? [Order – III.A.6]

The City of Oxnard is currently developing a watershed management program (WMP). This question is effective after WMP is approved for implementation.
