Ventura Stormwater Permit LID Alternative Compliance Stakeholder Meeting/Call for Projects Monday, October 24, 2011 1:30 - 3:30

Multipurpose Room
Ventura County Hall of Administration
800 S. Victoria Ave.
Ventura, CA 93009

The Ventura Countywide Stormwater Quality Management Program is developing a list of potential off-site mitigation opportunities for development projects unable to meet the new land development LID requirements on site due to technical infeasibility. The goal of this stakeholder meeting is to communicate to the land development community and organizations with interests in water resources and land preservation the tasks and methods we plan to employ to create this list.

We will also announce a call for projects to be considered for the list of potential off-site mitigation opportunities. Further details will be given on the information needed and how to submit a potential project for consideration.

For more information on the LID requirements and tools available to meet them visit:
