4. Non-Stormwater Discharge Prohibitions

Complete the following items in this section.

- 4.1 Provide an assessment of the effectiveness of the Permittee's control measures in effectively prohibiting non-stormwater discharges into the MS4 to the receiving water [*Order – III.A*].

The City of Thousand Oaks implements an Illicit Discharge Detection and Elimination (IDDE) Program, an Industrial & Commercial Facilities Program, a Planning & Land Development Program, a Construction Program, a Public Agency Activities Program, and a Public Information & Participation Program to enforce stormwater pollution control measures within the City's limits under *Municipal code Title 7, Chapter 8*. The IDDE Program has identified illicit discharges and succeeded in bringing awareness and education to the illicit dischargers involved. City staff has ensured the termination of the discharges in the field. The Industrial & Commercial Facilities Program has identified businesses that are successfully mitigating their properties and those that haven't. The program has succeeded in bringing awareness and education to business owners regarding how they can manage their facilities correctly. The Planning & Land Development Program has successfully ensured low impact development (LID) and construction activities are built in compliance with stormwater quality regulations. Through the Construction Program water quality from runoff on these construction sites has therefore been improved by the implementation of this program's requirements. The Public Agency Activities Program helps ensure that City staff and facilities are operating and being maintained in compliance with pollution control measures. Training is highlighted to keep education and awareness current. The Public Information & Participation Program is a City and County-wide program that disseminates education and awareness to the general public on how they can help prevent stormwater pollution.

- 4.2 Describe sources of non-stormwater discharges determined to be a NPDES permitted discharge, a discharge subject to CERCLA, a conditionally exempt non-stormwater discharge, or entirely comprised of natural flows [*Order - III.A.2*].

The non-stormwater discharge(s) to the ASBS caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS	<input type="checkbox"/>
Additional BMPs were implemented to address the exceedances above	<input type="checkbox"/>

4.4 If you had non-stormwater discharge(s) to an ASBS that caused or contributed to an exceedance receiving water limitations, WQBELs, water quality objectives in Chapter II of the Ocean Plan, or an undesirable alteration in natural ocean water quality in an ASBS, describe what additional BMPs were implemented to address these exceedances. How effective were those BMPs in addressing the exceedances? [*Order - III.A.4.b*]

If so, how many of the conditionally exempt non-stormwater discharges in Part III.A.3.b of the Order did you determine to be sources of pollutants that caused or contributed to an exceedance of receiving water limitations or WQBELs? If you made that determination, which type(s) of non-stormwater discharges in Part III.A.3.b were sources of pollutants? [*Order – III.A.6*]
