

### **Receiving Water Limitations Compliance Report – City of Fillmore**

The City of Fillmore is aware of elevated levels of selenium at the MO-FIL station and will be developing a source identification monitoring program. Selenium is known to be naturally occurring and the City is not aware of any commercial or industrial sources of selenium. The source identification program will begin during FY 2025/26 and an update of the City's efforts will be provided with the next annual report in December 2026.
